Indexes to Volume 3 (1984)

Subject Index

About stoichiometry of polycrystalline $BaTiO_3$ synthesized by solid–solid reaction, 591
Acoustic emission during indentation fracture of soda-lime glass, 907
Acoustic emission from the aluminium alloy 6061-T651, 268
Activities of Bi–In alloy components, 381
Amorphous-to-crystalline phase transformation by neutron irradiation of the alloy $Fe_{83}B_{17}$, 278
Angular and surface roughness dependence of the electrical conductivity of thin metal films, 464
Anisotropy of thermal expansion, elasticity, and electrical resistivity in single-crystal trinickel boride, Ni_3B, 1074
Anomalous bending strength of long brittle beams. The, 1052
Anomalous thermal expansion of Ti_3Pt, 325
Atmosphere effects in the grain boundary region of ZnO varistors, 213
Attempt to prepare Ag^+ ion fast conductor from AgCl. An, 221
Auger analysis of a calcium partially stabilized zirconia, 711
Auto-tempering of hexagonal martensite in a Ti–2 wt % Mo alloy, 333

Behaviour of resistance welded AISI 430 exposed to detergents, 681
Brittleness analysis of ceramic and polymeric materials by means of scratching experiments, 1069

Calculation of tilt angles for obtaining stereo transmission electron micrographs from crystalline specimens, 184
Cavitation erosion resistance of metglas alloy 2826 MB, 674
Ceramic powders containing tetragonal zirconia prepared by a sol–gel route, 124
Change of tetragonal ZrO_2 content in ZrO_2-toughened Al_2O_3 by hot isostatic pressing, 242
Characterization of chromium oxide hydrate gel, 515
Checking the assumption related to the structure of thin metal films from the variations in the Hall coefficient, 455
Chemical bonding in GeS_3Br and $GeS_{3.25}Br_{0.75}$ glasses, 825
Coating of microporous glassy carbon with nonporous surface layer, 789
Colloidal bismuth as nucleation catalyst for preparing magnetic glass–ceramics, 461
Combined conduction calorimeter and ultrasonic pulse velocity technique for monitoring the hydration/setting of Portland cement. A, 13
Comment on the dielectric loss factor in relation to electrical conduction. A, 1102
Compositional index of the pozzolanic potential of pulverized-fuel ash. A, 958
Compound and solid solution formation in the system, Li_2SnO_3–MgO, 786
Conduction polarization in solid materials, 613
Conductive polycarbonate–carbon composites, 165
Correlation between magnetic and mechanical hardness in some $Sm_2(Co, Cu, Fe, Zr)_{17}$-type magnets. A, 18
"Coulter" particle size analysis of dental gypsum materials. A, 93
Crack propagation studies of bulk polymeric materials in the scanning electron microscope, 39
Creep in polycrystalline Al_2O_3:Si, 993
Crystallization of amorphous germanium selenide films in the transmission electron microscope, 91
Curing of water glass–Portland cement–$CaSiO_3$ system under hydrothermal conditions, 477
C_3S hydration products viewed using a cryo stage in SEM, 411

D.C. electrical conductivity and dielectric properties of $MgAl_{2-x}Fe_xO_4$ spinel ferrite, 867
Debye characteristic temperatures of Nb_3Os, Nb_3Pt and Nb_3Au, 763
Dehydration and phase transformation in attapulgite (palygorskite) – an RDF study, 1105
Dendrite morphology and primary spacing in hypo-eutectic Al–Cu alloys, 194
Description of an atomistic model of environmentally assisted fracture in terms of catastrophe theory, 210
Design and some applications of an *in situ* SEM scratch tester. The, 133
Determination of $In_{0.53}Ga_{0.47}As$ layer thicknesses from etched steps, 340
Dielectric behaviour of cobalt–zinc ferrites, 1049
Dielectric properties of $Ag_5IW_2O_8$ superionic conductor films, 156
Dielectric properties of mercuric iodide (HgI_2) single crystals, 21
Dielectric properties of vacuum deposited cerium oxide films, 600
Direct observations of dynamic fracture mechanisms in polymeric materials, 961
Dissolution of calcium chloride-doped sodium chloride crystal, 349
Distribution of ZrO_2 and Al_2O_3 in ultrafine ZrO_2–Al_2O_3 powders formed by the spray-ICP technique, 699
Double stage crystallization of bulk $Ge_{20}Te_{80}$ glass, 97
Dynamic temperature crystallization in the liquid-quenched amorphous $Co_{79}B_{21}$ alloy, 319

Effect of additional iron and tin on the diffusion reaction at Sn–Cu alloy interface, 400
Effect of anomalous work-hardening on the stress-sensitivity of the relaxation-rate in polycrystalline metals at low temperatures, 955
Effect of atmosphere on the electrical conductivity of

0261–8028/84 $03.00 + .12 © *1984 Chapman and Hall Ltd.*

0261–8028/84 $03.00 + .12 © *1984 Chapman and Hall Ltd.*

RuO_2 and ruthenate layers, 1011
Effect of carbide precipitates on high temperature creep of a 20Cr–25Ni austenitic stainless steel, 557
Effect of CO oxidation on electrical properties of $(La_{0.8}Sr_{0.2})FeO_3$, 251
Effect of crystal structure on glass stability in Te–Ge–(Sn or Pb) alloys. The, 327
Effect of humidity on friction and shear strength of nylon. The, 291
Effect of insulator thickness on the forming of a MIM device. The, 331
Effect of material inhomogeneity on the fracture toughness of brittle materials. The, 77
Effect of silicon and molybdenum on liquidus–solidus gaps in an Fe–Cr–O alloy. The, 897
Effect of small deviations in $Al_{0.5}Fe_{0.5}(OH)_3$ stoichiometry on the direction of ageing of coprecipitated amorphous AlFe–hydroxides, The, 817
Effect of some accelerating admixtures on the hardening of β-dicalcium silicate, 821
Effect of specularity and thermal expansion in thin metallic films, 275
Effect of stress relaxations and load suppressions on Lüders band deformation, 544
Effect of substrate temperature on electrical and optical properties of Bi_2CdS_4 films prepared by spray pyrolysis technique, 427
Effect of thermal treatment on temperature dependence of d.c. conductivity of polymethyl methacrylate films containing adsorbed moisture, 475
Effects of acid and post heat treatment on the tensile properties of E-glass fibres, 685
Effects of second-component gases on the transport properties of silicon nitriding atmosphere. The, 199
Effects of thermal diffusion of nitrogen gas on silicon nitridation rate. The, 203
Effects of variability of the base powder on the sintering of β-SiC, 265
Elastic behaviour and internal friction of polycrystalline magnesium ferrite, 451
Elastic behaviour of mixed manganese–magnesium ferrites, 647
Elastic moduli of Ni–Zn ferrites at low temperatures, 352
Electrical breakdown studies with a.c. voltage on Al–CeO_2–Al thin film capacitors, 795
Electrical conducting properties of iodine–nylon-6 adduct and iodine–nylon-6–carbon composite, 799
Electrical conduction in barium titanate, 578
Electrical conduction in magnesium ferrite, 847
Electrical conduction in α-Nb_2O_5 doted with ZrO_2, 1039
Electrical conduction in sintered $Sb_{2/3}Zn_{7/3}O_4$ spinel, 323
Electrical conduction in trivalent iron molybdates, 921
Electrical conductivity of sodium–copper–germanate glasses. The, 593
Electrical properties of attapulgite, 299
Electrical properties of PVC–graphite thick films, 813
Electronic properties of the amylose–iodine complex, 1043
Electroconductometric investigation of Mn_3O_4 and the $Mn_3O_4 \rightleftharpoons Mn_2O_3$ transformation. An, 181
Electrothermographic behaviour of poly (methyl methacrylate) and leucomalachite green mixed systems, 1065
Electron paramagnetic resonance (EPR) study of the effect of calcination temperature on Cr(3+)-impregnated polycrystalline rutile TiO_2. An, 695
Electron paramagnetic resonance studies of cadmium stannates, 403
Electrophotographic characteristics of copper-phthalocyanine (CuPh)–polyvinyl cinnamate (PVCn) binder layers, 207
Epitaxy of antimony on lead sulphide {0 0 1}, 145
ESR study of the Pd–B amorphous alloy, 105
Estimation of the amounts of residual galss in devitrified cordierite. 95
Estimation of the crack extension parameter n of SiSiC as a function of exposure time at 1200°C in air and vacuum. An, 997
Estimation of the thermal shock resistance of simulated nuclear waste glass under water quenching conditions. An, 588
Etching kinetics of the low temperature chemically vapour deposited SiO_2 films, 643
Etch-rate study of thermally annealed LTCVD SiO_2 films as a function of initial deposition conditions. An, 979
Evaluation of available data for strain-enhanced grain growth during superplastic flow. An, 395
Evaluation of the toughness of high volume fraction W/Al composites, 968
Evidence for homeotropy in thermotropic polymers from electron microscopy, 44
Exchange diffusion phenomenon between free-silicon in reaction bonded SiC and liquid aluminium, 611
Extended lamellar substructures in lead–cadmium eutectic alloys, 937

Fabrication of phosphate-bonded mica ceramics by hot isostatic processing, 57
Factors influencing the crystallization of magnesium sialon glasses, 83
Fatigue crack growth measurement in polymers using electrically conductive surface grids, 971
Flux growth of crystals of some complex oxides, 539
Formation and compressive strength of the ionomer cements prepared from aluminosilicate glass and poly(acylic acid), 617
Formation and structure of unusually hard, thick damaged surface layer of copper, 18–8 stainless steel and iron, 917
Formation of stoichiometric bismuth trisulphide compound films, 837
Fracture resistance of short glass and carbon fibre/polyamide 6.6 composites, 861
Fracture topography of poly(methyl methacrylate). The, 1031
Fracture toughness of high pressure sintered Al_2O_3–ZrO_2 ceramics, 533
Fracture toughness studies in different regions of weld heat affected zones on a C–Mn steel, 512
Free dicyandiamide in crosslinked epoxy resins, 283
Frequency and specimen configuration effects on fatigue crack propagation in nylon 66, 224

Gamma-ray induced deterioration of natural rubber vulcanizates, 121

General expressions for the Wiedemann–Franz law in metallic layers, 725
Glass transition temperature and devitrification behaviour of glasses in the $Na_2O{\cdot}2SiO_2$–$BaO{\cdot}2SiO_2$ composition range, 654
Growth of Bi_2S_3 films by the hot wall method, 551

Heat treatment of explosively consolidated molybdenum: TEM studies, 15
High frequency dielectric constant of dry wood, 521
High ionic conductivity in polycrystalline tetragonal Y_2O_3–ZrO_2, 245
High resolution transmission electron microscopy (HRTEM) of epitaxially grown ZnSe and ZnSe/GaAs interfaces, 189
High temperature ($T \simeq 1000$ K) oxidation of molybdenum. The, 965
Homogenization of commercial Al–Mn alloys, 605
Humidity effects on the fracture mode transition in anodized 2024-T351 aluminium, 773
Hybrid particulate-filled epoxy-polymers, 9
Hydrothermal growth of La^{3+}-doped SrF_2 single crystal, 1097

Influence of dopants on bubble-formation in tungsten wire, 859
Influence of elastic stress on magnetic properties of a Cu–Ni–Fe alloy. The, 257
Influence of fluids on the microhardness of single crystal silicon. The, 651
Influence of the thermal regime of the multifilamentary wires preparation to the creation of the Nb_3Sn phase. The, 489
Infrared absorption and structural investigation of some vanadate glasses, 359
Infrared and Raman spectra of β-$TaPO_5$ and β-$NbPO_5$. The, 303
Infrared spectra of copper–calcium-phosphate glasses, 481
Infrared study of trivalent cations B and Fe in amorphous and crystalline phosphates, 36
Instrumented microtome for improved histological sections and the measurement of fracture toughness. An, 310
Integral equations in fracture statistics of round beams of brittle materials, 229
Internal friction peaks of cold worked Al–Mg alloys, 50
Interphase orientation relationships in directionally solidified silver–copper eutectic alloy, 759
Investigation in the Al_2O_3–Bi_2O_3–CuO system, 659
Investigation of plastic deformation in the sintered diamond compacts using photoluminescence spectroscopy. An, 1090
Iron–bored reaction products depending on the base alloy composition, 1046
Irradiation of the inorganic conducting polymer $(SN)_x$, 901
IR spectroscopic characterization of tetrabasic lead sulphate, 949

Junction growth equation and its application to explosive crystals. The, 565

Lattice imaging studies on 201R polytype of silicon carbide, 528
Lattice thermal expansion of $KLa(WO_4)_2$, 408
Limitation of solid solubility extension by rapid quenching. The, 1015
Limits for the isotropy of the Mayadas–Shatzkes conduction model, 743
Loading criteria for the fatigue failure of polyamide 66 fibres, 295
Low temperature diffusion measurements on d.c. sputtered multilayers of Nb/Ta, 217
Low temperature Mössbauer study of a Cu–Cd ferrite system, 636

Magnetic properties of $SrFe_{12}O_{19}$ particles prepared by the glass–ceramic method, 1007
Mechanical and dielectric properties of pineapple fibres, 667
Mechanism for metalloid strengthening of Udimet-700. A, 287
MgO films deposited by chemical vapour deposition, 423
Microscopic *in situ* observation of craze formation in polystyrene-glass bead composites, 307
Microstructure of eutectic Al–Cu ribbons rapidly solidified by the centrifuge melting technique. The, 945
Microstructural aspects of the lower temperature firing bauxite brick, 367
Microstructural instability of Ni–Mo–Al unidirectionally solidified eutectics, 363
Microstructure and corrosion behaviour of aluminium containing a small addition of tin, 585
Microstructure and performance of an alumina–zirconia tool bit, 315
Modulus of elasticity of simle metals from interatomic pair potentials, 536
Molar volumes of liquid Hg–Na alloys determined by the γ-ray absorption technique, 875
Molecular weight dependence of transcrystallinity of fibre reinforced thermoplastics. The, 1071
Morphology of sub-surface cracks below the scratch produced on soda lime glass by a disc cutter, 872
Mössbauer spectroscopy in cement manufacture, 88
Mössbauer spectrum and structure of iron (III) aluminium oxide, $FeAlO_3$. The, 159

Nature of γ' precipitates in rheocast IN-100 alloy, 71
Negative valency in transition elements, 805
New fluoronitride glasses in zirconium–metal–F–N systems, 162
New material for the fabrication of thin film resistors. A, 739
Non-colinear spin structure in Ni–Cd ferrite system, 385
Non-equilibrium and equilibrium surface composition profiles in binary solid alloys–characterization by the generalized surface free enthalpy, 518
Nonlinear I–V behaviour and conductivity measurements in amorphous semiconducting Ge–As–Te system, 850
Note on the use of the diametral compression test for the strength measurement of ceramics, 1000

Observation of order in craze fibrils of isotactic polystyrene by electron diffraction, 5

Observations of strain and microstructural instability during deformation of superplastic aluminium–calcium eutectic alloy in the as-extended state, 1020
On phase changes of carbon under dynamic conditions as observed by STEM, 117
On shrinkage and molecular extension, 499
On the $\alpha \rightarrow \beta$ transition by deformation of highly oriented poly(vinylidene fluoride), 929
On the anomalous work-hardening behaviour of polycrystalline metals at low temperatures, 629
On the chemical homogeneity of copper cobaltites ($Cu_xCo_{3-x}O_4$) prepared by thermal decomposition of nitrates, 633
On the effect of substrate temperature, deposition rate and annealing on the electrical resistivity of thin yttrium films, 627
On the estimation of the kinetic exponent in grain growth, 715
On the estimation of the Weibull modulus, 689
On the interpretation of Mössbauer spectra of high-temperature treated nontronite, 1080
On the investigation of specularity in thin metallic films and wires, 187
On the morphology of thermochemically produced Fe_2B/Fe interfaces, 791
On the pressure dependence of the plastic flow stress of alkali halide single crystals, 169
On the relationship between grain macrostructure and solute content in laboratory scale hypoeutectic Pb–Sb ingot castings, 1087
On the solidification of droplets in cadmium and zinc aerosols by the floating raft mechanism, 1095
On the solid state synthesis of $UMoO_6$, 840
On the theoretical conditions of chemical deposition of refractory solid solutions: titanium carbonitride, 355
On the thermoluminescence of X-ray irradiated polycrystalline $NaYF_4$ powder, 375
Optical absorption and site symmetry of copper (II) in some TeO_2–PbO–ZnF_2 glasses, 47
Optical absorption edge in thin amorphous oxide films based on germania, The, 391
Optical absorption in amorphous thin films of copper mixed with silicon monoxide, 1077
Optical absorption spectra of praseodymium phosphate glasses, 843
Optical energy gap in praseodymium phosphate glasses. The, 1055
Order of kinetics of thermoluminescence of $NaYF_4$, 554
Oriented $Pb_5Ge_{3-x}Si_xO_{11}$ thick films prepared by the printing technique, 239
Oxide dispersion in an amorphous magnetic composite, 1003

Phase diagram of CuS–GaS system and the range of $CuGaS_2$ phase field, 438
Phase structure of $Zn_{1-x}Mg_xS$ prepared by reaction of mixed chlorides with H_2S, 951
Phase transition in praseodymium manganite: electrical conductivity and DTA measurements, 899
Photoacoustic spectra of iron in calcium boro-aluminate glasses, 623
Photoresponse of amorphous $Se_{1-x}Te_x$ films, 253
Photovoltaic and rectification properties of SnO_2/malachite green + crystal violet dye/copper system, 271
Piezo-optic studies in mixed alkali halides, 337
Plasticization of acrylic resins used in dentistry, 1029
Precipitate identification in Ge-doped LEC grown InP single crystals, 990
δ' precipitation in Al–Li–Mg–Cu–Zr alloys, 829
Preliminary study of alumina sintering by addition of Si_3N_4. A, 987
Preparation and characterization of cadmium phosphate by simultaneous study of TSL and TSC, 177
Preparation of a dental amalgam alloy from dental amalgam waste, 53
Preparation of a diphasic photosensitive xerogel, 439
Preparation of amorphous ZrO_2 coatings from metal–organic solutions, 503
Preparation of molybdenum trisulphide by solid state chemical reactions, 313
Preparation of polypyrrole in aqueous media, 745
Preparation of rapidly solidified copper-based alloys by meltspinning, 975
Preparation of titanium disulphide with different stoichiometries, $Ti_{(1+x)}S_2$, and comparison of lattice parameters. The, 942
Pressure induced structural relaxation in amorphous solids – example of $Fe_{40}Ni_{40}P_{14}B_6$, 149
Properties of cement reinforced with high-modulus polyethylene fibrillated tape, 718
Pull-out tests with metallic glass ribbons in different matrices, 415
Pyroelectricity and mechano-dielectricity of lead zirconate titanate niobate [$Pb_{(1-Y/2)}(Zr_{1-(X+Y)}Ti_XNb_Y)O_3$] ceramic transducers, 733

Quenched-in vacancy defects in commercial Al–Mn alloys, 748

Radiation induced debonding of matrix–filler interface in organic composite materials, 68
Raman spectroscopic study of β-sialons in the system Si_3N_4–Al_2O_3–AlN, 1058
Rapid surface melting of $Cu_{60}Zr_{40}$ metallic glass, 109
Reaction annealing of copper–tin–copper–niobium composite, 370
Reaction-sintering of an Al_2O_3–AlON composite determination of mechanical properties, 890
Reinforcement of a brittle epoxy resin by metallic glass ribbons, 569
Relation between defect position in bending test and strength variance, 597
Relation between limiting drawing ratio and plastic strain ratio, 677
Relative stabilities of the Ni_6AlX (X = V, Nb, Ta) phases. The, 259
Removal of retained melt from LPE mercury cadmium telluride layers, 827
RHEED study of cadmium stearate Langmuir-Blodgett films. A, 25
Role of impurities on chemical etch pits in potassium-doped Li_2CO_3 single crystals. The, 1
Role of second-component gases on the nitriding rate of a silicon compact. The, 201
Role of Si_3N_4 additions in the reaction bonding of silicon

compacts. The, 112
Room temperature ageing of vapour deposited amorphous selenium thick films, 33

Shallow zinc diffusion in GaAs, 853
Short range order in Cu–Al alloys containing > 16 at% Al, 100
$Si_3Al_4N_4C_3$ and $Si_3Al_5N_5C_3$ compounds as SiC–AlN solid solutions, The, 249
Simple equations for the conductivity of thin metal films with unlike surfaces, 377
Single crystal preparation of the rare earth oxyorthosilicates R_2SiO_5 (R = Er, Ho, Dy) by a flux method, 65
Slow crack growth in bleached cellulose fibre cements, 127
Solid solutions with rock salt related structures on the join Li_2TiO_3–Li_3NbO_4, 893
Some aspects of the crystallography, flow and fracture of beryl ($Be_3Al_2(SiO_3)_6$), 855
Some aspects of the electrical properties of cement paste, 1083
Specimen preparation techniques for transmission electron microscope study of multifilamentary V_3Ga superconducting wires, 495
Spherulitic morphology in polypropylene structural foam mouldings, 1061
Squeeze casting of carbon fibre–tin alloy composites 232
Stabilized MnO and its solid solutions $Mn_{1-x}Zn_xO$ ($x = 0.001$ to 0.1) Part 1 Optical properties, 563
Stabilized MnO and its solid solutions $Mn_{1-x}Zn_xO$ ($x = 0.001$ to 0.1) Part 2 Electrical properties, 581
Standard Gibbs' energy of formation of La_2CoO_4 and comparison of stability of La_2MO_4 (M = Cu, Ni or Co) compounds, 388
Standard sublimation enthalpy of condensed $GeSe_2$ by torsion effusion measurements, 925
Statistical analysis of damage induced by water drop or water jet impact, 879
Strength measurements on rapidly solidified metal, particles, 79
Strengthening of Al_2O_3 by ion implantation, 1099
Stress corrosion of glass fibres in acidic environments, 728
Stress induced birefringence in alkaline earth fluorides, 707
Stress-softening and strain-hardening of plasticized poly(vinyl butyral), 620
Structural and optical studies on ion-plated pyrene thin films, 1025
Structural and phase equilibrium comparisons of Ag_2HgI_4 with Ag_2CdI_4 and Ag_2ZnI_4, 443
Structure and properties of coatings composed of TiN–Ti obtained by the reactive pulse plasma method, 505
Structure imaging of perfect V_3Si (A15 structure) by high resolution electron microscopy, 431
Study of electron spin resonance and optical absorption edge in amorphous mixed films of SiO and In_2O_3. A, 1035
Study of crystal growth using time lapse photography. A, 885
Study of high-field electrical conduction and of optical absorption of SiO/SnO_2 thin films. A, 703
Study of phase separation and two stage crystallization in $Al_{23}Te_{77}$ glass, 756
Study of reinforcement by prestressed metallic glass ribbons. A, 649
Studies of the ferroelectric–paraelectric transition of dicalcium lead propionate, 575
Study of the effect of test variables on the flexural modulus of plastics. A, 171
Study of the high iron concentrations in cement clinker by Mössbauer spectroscopy, 262
Superconductivity and Fajans' rule, 807
Superplasticity of the Mg–Ca eutectic alloy, 60
Surface amorphous and crystalline strucures in laser glazed Fe–Ni–P–B and Fe–Ni–Cr–P–B alloys, 141
Surface hardening of polyethylene through suphuric acid exposure, 509
Surface morphology evolution of sputtered, moving substrates, 523
Surface structure and the dissolution rates of ionic oxides, 810
Synthesis and characterization of indium intercalation compound of MoS_2, In_xMoS_2 ($0 \leqslant x \leqslant 1$), 671
Synthesis of $Rb_2BeSi_5O_{12}$ with a leucite structure, 1093
Synthesis of ruthenium and osmium dichalcogenide single crystals, 625
Systems Y_2O_3–Nb_2O_5 and Ho_2O_3–Nb_2O_5: the cubic solid-solution region. The, 492

Temperature dependence of tetragonal distortion in $A^{II}B^{IV}C_2^V$ chalcopyrite semiconductors, 767
Theoretical remarks about the transverse Hall effect in metal films at high magnetic field, 783
Theoretical values for the resistivity, the tcr and Hall coefficient of thin columnar and polycrystalline films. The, 447
Thermal conductivity of α-sialon ceramics, 915
Thermal expansion coefficient and density of amorphous and crystallized sodium polysulphides, 911
Thermal expansion of aramid fibres, 1028
Thermal expansion of hot-pressed cordierite glass ceramics, 153
Thermodynamics of high temperature oxidation of La_2O_2S and Nd_2O_2S at high sulphur partial pressure, 983
Thermoelectric power in chromium-copper alloy films, 293
Thermogravimetric analysis of silicon carbide–silicon nitride polycarbosilazane precursor during pyrolysis from ambient to 1000° C, 802
Thermoluminescence emission spectra of BaFBr, 205
Transmission electron microscopy of polyamides, 693
Transmission electron microscopy study of the passive films on nickel, 845
Transparent AlN ceramics, 471

Ultrasonic velocity in sintered uranium dioxide pellets, 835
Ultrasonic wave velocities in the structure II clathrate hydrate $THF \cdot 17H_2O$, 904
Uncertainty on the mean strength and Weibull's modulus of an alumina batch as a function of the number of

samples, 74
Useful reflection sets for the analysis of lattice strains in cubic crystals using the X-ray multiple diffraction technique, 29
Use of the double torsion test geometry to study the fracture of adhesive joints. The, 776
Use of magic-angle-spinning NMR in structural studies of Si–Al–O–N phases. The, 469

Variation of volume resistivity of E-glass and high silica glass with temperature, 420
Visualization of ordered spherical microdomains of block copolymers by phase contrast electron microscopy, 137

Wear of polymers, 779

XPS study of overlayer formation on a-Si(H) due to high dose ion implantation, 1109
X-ray diffraction, density and electrical conductivity studies of some zinc borate glasses, 341
X-ray diffraction infrared absorption studies of Bi–Se–Te system, 663
X-ray photoelectron and infrared spectroscopic studies of the decarboxylation/oxidation of cerium(III) carbonate octahydrate, 1017
X-ray powder diffraction pattern and unit cell of $BaSiN_2$, 131
X-ray topography evidence for energy dissipation at indentation cracks in MgO crystals, 560

Young's modulus and internal friction in alumina subjected to thermal shock, 345

Z_2 centres in NaCl crystals doped with gadolinium, 753
Zirconium fluoride glass: surface crystals formed by reaction with water, 484
